

```
1  public interface Lock {  
2      void lock();  
3      void lockInterruptibly() throws InterruptedException;  
4      boolean tryLock();  
5      boolean tryLock(long time, TimeUnit unit);  
6      Condition newCondition();  
7      void unlock();  
8  }
```
