

```
1  private class Node {  
2      T item;  
3      int key;  
4      Node next;  
5  }
```

**FIGURE 9.2** The `Node<T>` class: This internal class keeps track of the item, the item's key, and the next node in the list. Some algorithms require changes to this class.
