```java
33   public boolean contains(T item) {
34     int key = item.hashCode();
35     Node curr = head;
36     while (curr.key < key)
37       curr = curr.next;
38     return curr.key == key && !curr.marked;
39   }
```

FIGURE 9.18 The LazyList class: the contains() method.
